SHAPING THE FUTURE WITH PRECAST EXCELLENCE

# RCC PRODUCTS

Welcome to our comprehensive range of Reinforced Cement Concrete (RCC) products. We specialize in durable, versatile, and high-performance precast concrete solutions for a wide array of construction and landscaping needs. Our products are designed for superior strength, longevity, and ease of installation, offering excellent value for your projects.

# GRC PRODUCTS

GRC is a high-performance composite material made from a mix of cement, aggregate, water, chemical admixtures, and high-strength alkali-resistant (AR) glass fibres. The inclusion of glass fibres gives GRC its remarkable flexural and tensile strength, allowing for the creation of lightweight, thin, and intricate designs.

# PRECAST CONSTRUCTION

Welcome to the future of construction. Our precast concrete solutions offer a revolutionary approach to building, delivering unparalleled efficiency, quality, and sustainability. Gone are the days of lengthy on-site concrete pouring and curing. With precast, building components are manufactured in a controlled factory environment, then transported and assembled on-site, dramatically accelerating project timelines and enhancing overall structural integrity.

We offer precast concrete solutions that bring unparalleled advantages to your construction projects. By choosing us, you benefit from superior quality and durability due to our controlled factory manufacturing, leading to precise dimensions and enhanced material strength. Our solutions guarantee accelerated project timelines through efficient off-site production, significantly reducing on-site labor and costs. Furthermore, our commitment to sustainability means less waste and a lower environmental footprint for your build. We stand out with our state-of-the-art facility, stringent quality control, and the ability to provide customized solutions tailored to your specific needs, all backed by comprehensive support from design to delivery.

# TEXTURES

## PLAIN TYPE

Smooth, solid and fine, plain concrete surfaces feature small inclusions and even thickness.

## POROUS TYPE

Intriguing and sought-after, porous is a fine natural concrete surface with even thickness and porosity.

## NATURAL

Natural texture offers an authentic, organic surface with consistent texture and natural variations.

# ABOUT US

Unique Grills has been a trusted leader in the Reinforced Cement Concrete (RCC) product industry since its establishment in 1958. For over six decades, the unwavering support of our clients has been instrumental in our sustained presence and continuous evolution within this industry, driving us to develop newer materials and products. Our unwavering dedication to quality is underscored by our adherence to ISO 9001:2015 and IS standards ensuring that every product we deliver not only meets but often exceeds industry benchmarks for durability, performance, and environmental responsibility. Our mission at Unique Grills is to be the cornerstone of robust and sustainable construction by consistently providing superior quality Reinforced Cement Concrete (RCC) products. We are dedicated to empowering our clients with innovative, durable, and reliable precast concrete solutions that not only meet but exceed their project requirements and industry standards.

# SERVICES

At Unique Grills, we offer more than just high-quality precast products; we provide integrated services to guide your project from initial concept to successful completion. Our expertise begins with design and engineering support, where we collaborate with your team for optimal precast solutions, offering conceptualization, detailed architectural & structural design, and value engineering. The core of our offering lies in our state-of-the-art manufacturing, where we meticulously produce standard and customized RCC and GRC elements in a controlled factory environment, using standardized materials ensuring precise dimensional accuracy and rigorous quality control through every step. Once manufactured, our dedicated logistics team ensures efficient and just-in-time delivery of products to your site. While installation is expertly handled by our trusted partner network, we remain committed to offering comprehensive project management support, providing technical assistance and seamless coordination to ensure your precast project runs smoothly.
